Join us for a day of learning and networking! Together, we will hear from presenters and panelists about the importance of the gender-sensitive language we use with our patients, creating safe and welcoming clinical/professional environments, and how to help our clients navigate the intersection between the medical and mental health services they need. Additionally, recent research about the Minnesota Rural/Urban Differences in Health and Well-being of LGBTQI+ Adults will be presented. We will have plenty of time for questions, sharing ideas, and networking with colleagues.
